ROBERT AND STARMYE HALPAIN

Type: ROUTINE INSPECTION
Date: 25-MAY-2016

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

- In the outdoor portion of the sheltered part of the kennel, there was an excessive accumulation of feces in the cages and in the wash down below the runs. This affected the majority of the runs. Waste accumulation increases the risk of contamination to the dogs, and also creates noxious odors that are an attractant to flies and other pests. Excreta must be removed from the enclosures every day, and the wash downs must be cleaned as often as needed to prevent excessive accumulation of waste.

Correct by: 25 May 2016

Inspection and exit interview conducted by Michael Tygart (VMO), David Sabala (SACS), and Elizabeth Meek (ARD) with facility representative.

Additional Inspectors

Sabala David, Supervisory Animal Care Specialist
Theodorson Elizabeth, Director
