Type: ROUTINE INSPECTION
Date: 13-FEB-2014

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***** A female Bullmastiff named Sally, ID#900108001281135, was lame and holding up her left front limb which appeared to have a reddened circular lesion on the bottom of the second digit pad. The toe nails on this foot are very short and the toe nails are recessed behind the pads. The foot appears compressed dorsal to plantar. This is a younger dog and the owner stated this was a longstanding condition of approximately 5 months. The animal was bright, active, and alert. This animal must be examined by a licensed veterinarian and health records must be maintained. Documentation must be maintained for any health related problems and it must include the following information:

- Identity of the animal.
- Descriptions of the illness or injury
- Dates, details, and results of examinations, tests, and other such procedures.
- Dates and other details of all treatments, including the name, dose, route, frequency, and duration of treatment with drugs or other medications.
- Follow-up exams to determine resolution of problem

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***** During the time of inspection, there was a 1000 ml bottle of Safeguard cattle and goat dewormer for use in parasite control at facility. This medication did not have a prescription label or instructions for its use. If Safeguard is handled or administered improperly, it can be injurious or fatal to the animals and/ or owners and personnel. Adequate guidance to personnel must be provided to those who are involved in handling, dosing, and administering. The licensee was using medications not approved for use in dogs and not approved by the attending veterinarian. All medications not approved for use in dogs must be approved by the attending veterinarian and must be listed on

Inspection Report

the Program of Veterinary Care (PVC). The mixing instructions (if any), dosage, and directions for use must also be listed on the PVC.

***** The following medications were past the expiration date: Cephalexin 500 mg- expired 12/12 ,Panacur 1000 ml bottle- expired 08/13, Amoxicillin 500 mg expired 12/23/13, and bottle of Metronidazole 250 mg expired 12/13. In addition there was a reconstituted brown bottle of an unknown substance without a label with no expiration date and no labeled dosage or directions for use. These medications were intermingled with other pharmaceuticals that are currently being used in the sheltered facility and are therefore ready for use. The effectiveness of the dosage level and expected results when expired drugs are administered to dogs could be drastically changed or may not work as anticipated. The licensee must ensure that all medications used are not expired and labeled properly in accordance with standard veterinary practices and manufacturer's recommendations.

This affects all animal at the facility.

3.6(a)(2)(2)

PRIMARY ENCLOSURES.

3.6 (a) (2) (ii)

*****The heat lamps hung over the enclosure with 2 twelve week old Mastiff puppies did not have a wire guard to protect the puppies from thermal injury. One other enclosure with an adult female also had a heat lamp over the enclosure that did not have a wire guard. These heat lamps were hung approximately 3 feet off the floor and could be touched by the dogs. Enclosures must be constructed and maintained so that they protect dogs from injury.

This affects at least 3 animals.

To be corrected by: February 18, 2014
