Type: ROUTINE INSPECTION  
Date: 25-JAN-2017

---

### 3.127(d) REPEAT

#### FACILITIES, OUTDOOR.

Wallabies, kangaroo and muntjac are housed in a large enclosure with an 8 foot high primary enclosure fence but the enclosure is surrounded by a perimeter fence which is only 4 feet in height. A fence less than 6 feet high for these animals must be approved in writing by the Administrator. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. It must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside the perimeter fence.

A request for a variance which describes the size of the property and current fence in place may be sent to :  
USDA APHIS Animal Care  
2150 Centre Ave . Building B Mail Stop 3 W 11  
Ft. Collins, Co 80526

The inspection and exit briefing was conducted with the owner
