CRITTERS EXOTIC PETS

Type: ROUTINE INSPECTION
Date: 19-APR-2018

2.131(c)(1) CRITICAL

HANDLING OF ANIMALS.

On Friday April 15, 2018, the licensee publicly exhibited a male Ring Tailed lemur, "Dirk" inside the store. The animal bit a customer who required immediate medical attention. The lemur was wearing a harness and leash but was not under the direct control of the licensee at the time the bite occurred. There was insufficient distance and/or barriers between the animal and the public to assure the safety of the public. Any animal must be handled so there is minimal risk of harm to the animal and to the public.

3.82(a)

FEEDING.

A seven to eight month old female Patas monkey, "Scarlet" is currently on exhibit in the store. This animal is fed soy infant formula via bottle five to six times daily and supplemented only with fruits and vegetables between bottle feedings. This diet is considered nutritionally inadequate and incomplete and could result in physical or metabolic deficiencies. The diet for non-human primates must be appropriate for the species and age of the animal according to generally accepted professional and husbandry practices and nutritional standards.

The attending veterinarian should be consulted regarding the nutritional needs of this animal and an appropriate diet plan designed and implemented. Correct by: close of business April 23, 2018.

The inspection and exit interview was conducted with the manager.
