Type: ROUTINE INSPECTION
Date: 25-JAN-2017

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The written program of veterinary care (PVC) is incomplete. Rabbits are currently part of the animal inventory at this facility and are not listed on the program. The licensee stated that routine dewormings are administered to the rabbits however no information is included on the PVC to reflect the product name, dose, route or frequency of administration. The PVC should accurately reflect any routine veterinary care and related husbandry including but not limited to: internal and external parasite treatment and control, restraint techniques and complete euthanasia description.

The licensee should consult with the attending veterinarian and develop a complete and accurate written program of veterinary care that reflects the care provided to the rabbits. A completed PVC will ensure the practices at this facility are done with the knowledge and direction of the veterinarian.

Correct by: February 25, 2017.

The inspection and exit interview were conducted with the licensee.
