### 3.131(d)

#### Sanitation.

In the back storage room there was a moderate accumulation of rodent droppings along the floor next to the back walls with a heavier accumulation covering an approximately 1.5 sq. ft. corner area. This back room is used to store animal food, bedding and other animal supplies. Pests and vermin may contaminate food and supplies as well as harbor and spread diseases. A safe and effective pest control program must be established and maintained to protect the health and well-being of the animals.

Correct by 02/27/2026.

This inspection and exit interview were conducted with a facility representative.
