Issaquah, WA 98027

Customer ID: **331125**
Certificate: **91-A-0140**
Site: 001
Traipse Inc.

Type: FOCUSED INSPECTION
Date: 09-AUG-2023

2.40(b)(2) **Direct** **Repeat**

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The two Bengal cats, "Big Mac" (2-year-old male) and "Coco" (3-year-old female) had loose stool noted on the inspection conducted on 24-JUL-2023. However, these animals still have not been examined by a veterinarian as required. Changes in the consistency of stool may indicate several medical conditions related to parasites, diet, stress, or more serious issues. The licensee must have the animals examined by a veterinarian to determine an appropriate plan for diagnosis and treatment.

3.1(b) **Repeat**

Housing facilities, general.

Several overflowing garbage receptacles were noted in the laundry room where animal food was stored. The sink was also filled with utensils waiting to be cleaned. In addition, numerous soiled litter boxes awaiting cleaning were found stacked in another room. Animal areas must be kept neat and free of any accumulation of trash, waste material, or other discarded materials. These attract rodents, insects and other pests, and contribute to odor.

This inspection and exit interview were conducted with the facility representative.
